What's New in the Audio Detector?

- The application is simple, one-button user interface.
- Audio Detector program is silent, uses very little of the computer resources.
- Audio Detector has the "standard" On-Off method, but it can be changed to any mode you want.
- Audio Detector can record sounds which we can perceive as a voice

or music, such as speaking, clicking of the mouse, running water, etc. - Audio Detector records the audio sound as a WAV file in a predefined format. - Audio Detector supports multiple samples, and can change the sample rate using the Record option. - Audio Detector can also start the recording in real time, and can start the recording after a preset or random delay.
